

PV Modules LC Series

High-efficiency PV Modules

LORENTZ LC Series PV Modules are high quality, high efficiency modules which are proven for use in off grid applications.

LC Series Modules are used in a wide range of applications including water pumping, water purification systems and anywhere that a reliable, robust PV module is required.

The LC Series modules are built with sturdy aluminium frames, advanced EVA encapsulation and triple layer backsheets to meet the most stringent safety requirements.

Benefits

- Know good quality modules from a recognised supplier
- Tested with LORENTZ solar pumping systems which reduces project risk
- Module specifications included as standard in LORENTZ COMPASS solar planning software and kept up to date
- LORENTZ guarantee

Features

- High conversion efficiency
- Pre-wired junction box with connectors for "plug and play"
- Reliable bypass diodes to prevent overheating and minimise power loss from shading
- Manufactured in an ISO 9001:2000 certified factory
